

Lab 001 - Initial Raspberry Pi Deployment

Mohammad N Hasan

Completed 6/30/26

Comprehensive Lab Report

Objective

Deploy a Raspberry Pi Zero W running Raspberry Pi OS and configure secure remote administration over SSH.

Hardware & Materials

- Raspberry Pi Zero W
- 128 GB MicroSD Card
- Windows 11 PC/Ubuntu Server
- Home Wi-Fi

Tasks Completed

- Installed Raspberry Pi OS
- Configured Wi-Fi
- Enabled SSH
- Assigned hostname
- Connected via SSH
- Verified internet connectivity

Software

- Raspberry Pi OS Lite
- Raspberry Pi Imager
- Windows Powershell

Commands Used

`</> Bash`

`ssh student@192.168.1.246`

hostname

whoami

ip addr

ip route

ping google.com

Verification/Lessons Learned

- Successfully connected through SSH.
- Internet connectivity verified.
- IP address confirmed.
- Hostname verified.
- Learned how SSH established a secure remote connection.
- Learned how to view interface configuration.
- Learned basic Linux navigation.
